

Task 3:

Potential partners:

-Town halls:

The application would be specialized on a city and would focus on the activities proposed by the city council in addition to inform about the "hidden surprises" of the city and other activities to be carried out in the city.

-Office of Tourism, State (Ministry of Tourism)

They could ask the application to add a city or zone to its perimeter as part of an operation to make an abandoned area attractive, for example (enhance a particular area or heritage), or allow the application to use information from services such as location of bike stations, presence of bike lanes, electric scooter etc. ...)

Problems and interests:

City Hall: this would allow residents and visitors of the city to benefit from a very complete information service

- restaurants (user can have practical information about restaurants or pubs : a restaurant is located nearby, happy hours in this bar, this craftsman's shop is located at the bottom of this street)
- Shops/brands (user can have information about new stores in the area: the brand has been created on this street where a store is on this street)
- museums (the user can have information about cultural events in his area: an exhibition is currently taking place in this museum).
